

SOFTWARE ENGINEER

KASUNI MADEESHA

Matara, Southern Province, Sri Lanka
kmkariyawasam4@gmail.com | +94741366911
[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Third-year Computer Science undergraduate specializing in full-stack development with foundational knowledge in AWS cloud services. Experienced in building and deploying REST APIs, implementing authentication systems, and working with modern technologies including MERN stack, and responsive UI development. Demonstrated ability to optimize application performance, automate workflows, and build scalable web applications through academic and personal projects.

SKILLS

- **Programming Languages:** Java, JavaScript, Python, C
 - **Web :** HTML, CSS, React.js, Node.js, Express.js, Tailwind CSS
 - **Databases/OS :** MySQL, MongoDB, Linux, Windows
 - **Tools & Technologies:** Git, GitHub, REST APIs, Postman, AWS (basic)
 - **Software Development Concepts:** OOP, RESTful APIs, Database transaction management, SDLC
 - **Soft skills:** Positivity, Teamwork, Problem-solving, Continuous learning mindset
-

PROJECTS

Full-Stack Development Projects

Kaelura Grand Hotel - Hotel Management System (MERN Stack) | [GitHub URL](#) | [Live Demo](#)

- Created full-stack system supporting complete booking lifecycle (search, availability, reservation)
- Enforced permission-based authorization for 2 user roles (Admin/User) across protected routes
- Developed 10+ REST API endpoints for booking, user, and room management
- Crafted responsive UI with 10+ reusable components using React and Tailwind CSS
- Established admin dashboard managing multiple modules (rooms, users, bookings, gallery)
- Modeled 6 core data entities using Mongoose schemas

Book Store Management System (MERN Stack) | [GitHub URL](#) | [Live Demo](#)

- Developed a full-stack MERN application supporting book browsing, searching, and ordering
- Implemented user authentication with secure login and registration functionality
- Implemented tiered permission system for Admin and User roles across protected routes
- Enabled admins to manage entire inventory including adding, editing, and deleting books
- Designed responsive UI using React with reusable components for seamless user experience

Retail & Wholesale Management System (PHP, MySQL) | [GitHub URL](#) | [Live Demo](#)

- Built full-stack system handling 3 user roles (Admin, Cashier, Customer)
- Implemented session-based authentication across secured system modules
- Designed relational database with 5+ tables for inventory, orders, and customers
- Streamlined order processing with dual pricing model, improving billing efficiency
- Handled both retail and wholesale transactions within a unified system

CERTIFICATIONS

- | | |
|--|---------------------------|
| • Full-Stack Web Development (MERN) | SKYREK academy |
| • Postman API Fundamentals Student Expert | Postman, Inc |
| • AWS Cloud Practitioner Essentials | Amazon Web Services (AWS) |
| • Machine Learning I | Columbia+ |
| • Linux Essentials | Cisco Networking Academy |
| • Linux Unhatched | Cisco Networking Academy |
| • Saegis Code Pulse 2024-Participation Certificate | Saegis Campus |
-

EDUCATION

Saegis campus

Expected Graduation: 2027

B.Sc.(Hons) Computer Science

- Currently pursuing a B.Sc.(Hons) Computer Science Degree At Saegis Campus.

Advanced Level Exams

2021

- Completed the Advanced Level Exams Successfully in Physical Science Stream in 2021.
-

REFEREES
